

GAIAZOV ALMAZ

Software Developer · Backend & AI Engineer

Python · LLM · Speech-to-Text · Data Engineering · Backend APIs

Kazan, Russia · +7 (953) 409-90-18 · gayazking@gmail.com · github.com/gayazking · retynex.pro

PROFESSIONAL SUMMARY

Software developer and backend engineer with 5+ years of experience building Python backends, AI-powered systems, data pipelines and business automation. My flagship project is Retynex Pro — a commercial B2B SaaS for AI-driven call & chat analytics. I currently serve three long-term clients as an independent contractor under signed agreements, 100% remote.

TECHNICAL SKILLS

Programming Languages: Python (Advanced), Go, SQL, JavaScript / TypeScript

AI & Data Engineering: LLM Integration, Prompt Engineering, Speech-to-Text (STT), Data Ingestion & ETL, 1C Architecture Integrations, scikit-learn, NLP

Backend & API Development: FastAPI, Flask, aiogram, REST APIs, Telegram Bot API, WhatsApp Business API, Webhooks, OAuth 2.0

Frontend: TypeScript, React, modern HTML/CSS, responsive UI for admin panels and dashboards

DevOps & Infrastructure: CI/CD Pipelines, Docker, Containerization, Cloud Infrastructure Management, Linux System Administration, nginx, Git/GitLab

Monitoring & Observability: Grafana dashboards, Prometheus metrics, custom exporters, alerting; GPU & ASR cluster observability

Databases: SQL / NoSQL Database Management & Optimization — PostgreSQL, ClickHouse, Redis, MongoDB

BI & Analytics: Yandex DataLens, Metabase, Google Data Studio

Automation & Workflow: n8n (workflow orchestration), webhooks, scheduled jobs, business process automation

AI-assisted Development: Claude Code, ChatGPT, GitHub Copilot, OpenAI Codex — daily use for code generation, refactoring and acceleration of delivery

Integrations: AmoCRM, Bitrix24, 1C, Yandex Direct / VK Ads, Calltouch / Comagic / UIS, Google Sheets

FLAGSHIP PROJECT

Retynex Pro (retynex.pro) — AI-Driven Call & Chat Analytics SaaS

Commercial B2B platform automating quality assurance for customer service teams and call centers. Engineered for LLC «Girudomed».

- Backend architecture: engineered and scaled the primary backend infrastructure for a production B2B SaaS platform
- AI & speech processing: integrated LLMs and Speech-to-Text engines to automatically transcribe, analyze and grade 100% of operator voice calls against custom corporate KPIs
- Omnichannel chat engine: WhatsApp Business API, Telegram and regional messengers with automated replies and real-time smart prompts for operators
- Data engineering & BI: centralised pipelines extracting and synthesising commercial data from 1C; interactive executive dashboards in Metabase and Yandex DataLens
- **Stack:** Python, FastAPI, LLMs, STT, PostgreSQL, ClickHouse, Redis, Docker, CI/CD, Grafana, Prometheus, n8n, Metabase, WhatsApp Business API, 1C

PROFESSIONAL EXPERIENCE

Backend Developer / AI Engineer (Independent Contractor)

Apr 2025 – Present

Client: LLC «Girudomed» — healthcare services, Kazan (remote)

- Long-term software development and IT services contract
- Built and scaled Retynex Pro (see flagship project above)

- QR-Based Time & Attendance System for medical staff: secure QR check-in ecosystem and mobile-friendly apps logging precise clock-in/clock-out times into a central database
- **Stack:** Python, FastAPI, LLM, STT, PostgreSQL, ClickHouse, n8n, Metabase, Docker

Backend Developer / Data Engineer (Independent Contractor)

Jun 2025 – Present

Client: LLC «Clever» — business services, Kazan (remote)

- Long-term software development and IT services contract
- Automated Expense Management Bot: tailored Telegram bot tracking accountable employee funds; automated data ingestion eliminating manual paperwork and reducing financial data loss to zero
- In-house automation platform: document workflow, operational data collection, management notifications
- Go service for high-throughput data aggregation; n8n workflow automations; Metabase + DataLens dashboards
- **Stack:** Python, Go, FastAPI, aiogram, PostgreSQL, ClickHouse, n8n, Metabase, Docker

Backend Developer (Independent Contractor)

May 2025 – Present

Client: IE Fandrikh A.E. — B2B IT consulting, work for multiple end-clients (remote)

- Long-term software development and IT services contract
- Telegram bots, REST API integrations bridging CRM, accounting (1C), marketplaces and payment providers; ETL pipelines and CLI utilities
- n8n workflow automations; Go services for high-throughput data processing and competitor-price monitoring
- **Stack:** Python (FastAPI, Flask, aiogram), Go, PostgreSQL, Redis, n8n, Docker, nginx

EDUCATION

Master's Degree in Automation and Control Systems

2013 – 2019

Kazan National Research Technical University named after A.N. Tupolev (KNRTU-KAI)

- Graduated with Honors (Red Diploma)

CERTIFICATIONS & COURSES

- DevOps Engineer — Professional Course, Skillbox
- Python Developer — Professional Course, Skillbox

REMOTE WORK CAPABILITY

My entire practice is 100% remote and internet-based. Deliverables are software artifacts — source code, deployed services, configured dashboards — delivered via Git and cloud tools. Communication via Telegram, email and video calls. I am available for remote engagements worldwide.
