PROFESSIONAL SUMMARY

Software developer and backend engineer with 6+ years of experience building Python backends, AI-powered systems, data pipelines and business automation. My flagship project is **Retynex Pro** — a commercial B2B SaaS for AI-driven call & chat analytics. Lead Software Developer at LLC «Girudomed» (full-time, since July 2024), where I have engineered and scaled the company's core AI and backend platforms. In parallel, I serve long-term external clients under signed agreements, 100% remote.

TECHNICAL SKILLS

Programming Languages: Python (Advanced), Go, SQL, JavaScript / TypeScript

AI & Data Engineering: LLM Integration, Prompt Engineering, Speech-to-Text (STT), Data Ingestion & ETL, 1C Architecture Integrations, scikit-learn, NLP

Backend & API Development: FastAPI, Flask, aiogram, REST APIs, Telegram Bot API, WhatsApp Business API, Webhooks, OAuth 2.0

Frontend: TypeScript, React, modern HTML/CSS, responsive UI for admin panels and dashboards

DevOps & Infrastructure: CI/CD Pipelines, Docker, Containerization, Cloud Infrastructure Management, Linux System Administration, nginx, Git/GitLab

Monitoring & Observability: Grafana dashboards, Prometheus metrics, custom exporters, alerting; GPU & ASR cluster observability

Databases: PostgreSQL, ClickHouse, Redis, MongoDB

BI & Analytics: Yandex DataLens, Metabase, Google Data Studio

Automation & Workflow: n8n (workflow orchestration), webhooks, scheduled jobs, business process automation

AI-assisted Development: Claude Code, ChatGPT, GitHub Copilot, OpenAI Codex

Integrations: AmoCRM, Bitrix24, 1C, Yandex Direct / VK Ads, Calltouch / Comagic / UIS, Google Sheets

FLAGSHIP PROJECT

Retynex Pro (retynex.pro) — AI-Driven Call & Chat Analytics SaaS

Commercial B2B platform automating quality assurance for customer service teams and call centers.

Engineered for LLC «Girudomed».

- **Backend architecture:** engineered and scaled the primary backend infrastructure for a production B2B SaaS platform
- **AI & speech processing:** integrated LLMs and Speech-to-Text engines to automatically transcribe, analyze and grade 100% of operator voice calls against custom corporate KPIs
- **Omnichannel chat engine:** WhatsApp Business API, Telegram and regional messengers with automated replies and real-time smart prompts for operators
- **Data engineering & BI:** centralised pipelines extracting and synthesising commercial data from 1C; interactive executive dashboards in Metabase and Yandex DataLens

Stack: Python, FastAPI, LLMs, STT, PostgreSQL, ClickHouse, Redis, Docker, CI/CD, Grafana, Prometheus, n8n, Metabase, WhatsApp Business API, 1C

PROFESSIONAL EXPERIENCE

Lead Software Developer / Backend & AI Engineer (Full-time, Remote) Jul 2024 – Present
LLC «Girudomed» — healthcare services, Kazan (remote, full-time employment)

- Owner of **Retynex Pro** platform: built from inception and scaled to production B2B SaaS
- End-to-end backend ownership: Python/Go services, REST APIs, LLM & STT integrations, omnichannel chat engine
- **QR-Based Time & Attendance System** for medical staff: secure QR check-in ecosystem and mobile-friendly apps logging precise clock-in/clock-out times into a central database
- Data engineering & BI ownership: ETL pipelines from 1C, executive dashboards in Metabase and Yandex DataLens

Stack: Python, FastAPI, Go, LLM, STT, PostgreSQL, ClickHouse, Redis, n8n, Metabase, Grafana, Prometheus, Docker, 1C

Backend Developer / Data Engineer (Independent Contractor) Jun 2025 – Present
LLC «Clever» — business services, Kazan (remote)

- Long-term software development and IT services contract
- **Automated Expense Management Bot:** tailored Telegram bot tracking accountable employee funds
- In-house automation platform: document workflow, operational data collection, management notifications

Stack: Python, Go, FastAPI, aiogram, PostgreSQL, ClickHouse, n8n, Metabase, Docker

Backend Developer (Independent Contractor) May 2025 – Present
IE Fandrikh A.E. — B2B IT consulting, work for multiple end-clients (remote)

- Long-term software development and IT services contract
- Telegram bots, REST API integrations bridging CRM, accounting (1C), marketplaces and payment providers
- n8n workflow automations; Go services for high-throughput data processing

Stack: Python (FastAPI, Flask, aiogram), Go, PostgreSQL, Redis, n8n, Docker, nginx

Backend Developer / IT Consultant (Independent Contractor) Apr 2026 – Present
LLC Stomatology «Master Dent» (Azurdent / azurs.ru) — dental clinic chain, Kazan (remote)

- Long-term software development and IT services contract
- **Web platform (azurs.ru)** development & maintenance: online booking, patient personal account, CRM/messenger integrations
- 1C ecosystem integrations: REST API connectors, patient and service directory sync, financial reports automation
- **BI & analytics:** financial and schedule dashboards in Yandex DataLens; ETL pipelines from 1C to PostgreSQL

Stack: Python (FastAPI), Go, JavaScript/TypeScript, 1C:Enterprise 8, PostgreSQL, Yandex DataLens, n8n, Docker

EDUCATION

Master's Degree in Automation and Control Systems 2013 – 2019
Kazan National Research Technical University named after A.N. Tupolev (KNRTU-KAI)

Graduated with Honors (Red Diploma).

CERTIFICATIONS & COURSES

- DevOps Engineer — Professional Course, Skillbox
- Python Developer — Professional Course, Skillbox

REMOTE WORK CAPABILITY

My entire practice — both full-time and contractor engagements — is 100% remote and internet-based. Deliverables are software artifacts delivered via Git and cloud tools. Communication via Telegram, email and video calls.

LANGUAGES

- **Russian** — Native
- **Tatar** — Native
- **English** — Upper-Intermediate (B2)
